

CYTE Accelerate

Our
ACCELERATE
Solution

Utilise our broad range of specialised services

Trial delivery challenges

Clinical trials are often faced with a wide variety of challenges, resulting in increased study numbers, complexity, outsourcing and amendments. Ultimately, it can take longer for medicines to get to market and benefit patients.

Our solutions for going the distance

We provide a range of intuitive and practical services to deliver your clinical development programme.

Clinical Monitoring

Data Management

Data Sciences and Statistics

Events Management

Feasibility Studies

Global Project Management

Medical Communication

Quality Assurance

Sites ID and Selection

Site Management

Start Up Acceleration

Thought Leadership

CYTE Accelerate

If you're looking for a committed partner to accelerate your study from start-up through to completion, we offer agile, cost-effective, customisable services. These include:

Project management

We provide planning, risk management and effective study execution.

Clinical monitoring

We monitor our projects so they are completed in a timely, quality manner, to relevant regulations.

Quality assurance

We can provide audits, including systems/ processes, investigator sites, and vendors/ third-parties.

Feasibility studies

Our global network of sites is trained and ready to source for clients.

Data management

We produce transparent, accountable, fast and accurate data and results.

Training for sites

We train sites on regulations, compliance, best practices and standards, online or in-person.

Events

We can organise and manage your meeting, creating dynamic, impactful occasions.

Regulatory services

We understand regulatory and ethical requirements in 45 countries, ensuring compliance.

Digital health deployment

We use cutting-edge technologies including wearables and machine learning in studies.

Medical communication

We carefully craft messaging for end audiences, from regulatory bodies to medical education.

Start-up acceleration

Utilising our network enables contracts and budgets to be pre-negotiated ensuring a fast start.

Data sciences and statistics

We use statistical methods to report on data quality, derive insights and support decisions.

CYTE: Your research partner of choice

Case study

CYTE was enlisted last minute by a top-five pharmaceutical company in the feasibility stages of a major real-world evidence study. The client sought eligible research site options around the world. CYTE Locate offers access to a network of almost 3,000 sites in 45 countries. In a five-week period we assessed our network according to a stringent set of study criteria and identify 856 eligible sites. We launched a feasibility questionnaire via CYTE Accelerate, and reviewed responses in real time using the CYTE Connect platform. The client was also assured of continuity of data quality and completeness across their selected sites in every region by continual monitoring and annual auditing.
